Languages

I am an app/web developer and cybersecurity enthusiast who loves to explore the huge world of Computer Science.

I like to solve challenging real-world problems programmatically. As a student, I am currently in my learning phase so I strive to learn as much as I can to broaden my career prospects. I see myself as a cybersecurity analyst in the future.

EDUCATION

2008-2014 • Beacon House School System (High School)

2015 - 2018 • Wahaj Hussain School System (Ordinary levels)

Achievement : 4A*/4A's/1B

2018 - 2019 • Whales College (Advanced levels)

Achievement : 1A*/2A's

2019 - 2023 • BS in Computer Science National University of computer and emerging sciences.

Current CGPA (3.5+)

Gaining Knowledge

I spent most of my leisure time learning the latest technologies and I always try to implement the theory I learned practically. Cybersecurity has been my area of interest for a long time so I try to understand those attacks and enhance my knowledge in this field which may assist me in developing future projects and help me secure them as well.

Work Experience

I have worked as a freelancer developing static and dynamic websites. Projects that I have worked on are as follows:

Alitfit : A fitness product website for UK based clients

Link :- <https://alitfitt.web.app/>

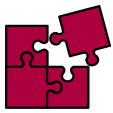

Burney Store: An eCommerce store for UAE based clients

Link :- <https://burneystore.com/>

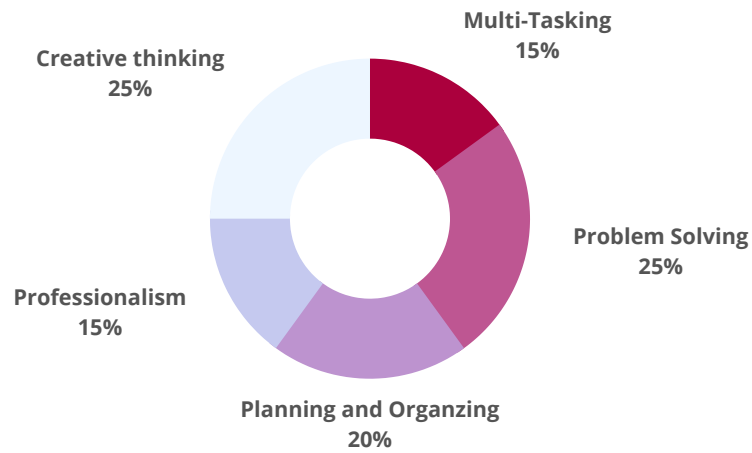

I have also developed some other university project:-

Linux Shell :- <https://github.com/hamzausmani302/CUSTOM-LINUX-SHELL-rocket-shell>

Restaurant Recommendation System using ML:- <https://github.com/hamzausmani302/Recommendation-system-in-cplusplus>
